IS PLEASED TO ANNOUNCE A CERTIFICATE COURSE ON

# PYTHON FOR STATISTICS

YOU WILL LEARN:

PYTHON

DATA  
VISUALIZATION

STATISTICAL  
ANALYSIS

MACHINE  
LEARNING

## About the Certificate Course

Python for Statistics is a 45-hour multidisciplinary certificate course that integrates statistical concepts with Python programming, data analysis, and visualization. Participants will learn to analyse real-world datasets, perform descriptive and inferential statistical analysis, create meaningful visualizations, apply statistical techniques using Python, and interpret analytical results. The course emphasizes hands-on learning through practical exercises, real-world datasets, and industry-oriented projects.
