About the Certificate Course

The 'Advanced Excel for Business Analytics' certificate course is designed to develop practical skills in Excel, Power BI, data analysis, and AI-assisted analytical techniques. Through hands-on learning, participants will gain experience in data cleaning, visualization, dashboard development, statistical analysis, Power BI reporting, and AI-assisted Excel applications. The course emphasizes real-world applications and industry-relevant analytical skills, enabling learners to transform data into actionable insights and support data-driven decision-making.

Registration Ends
