**STATISTICAL DATA
ANALYSIS USING SPSS**

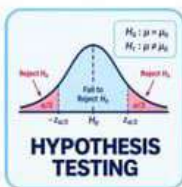

YOU WILL LEARN:

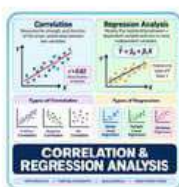

DATA
MANAGEMENT

DESCRIPTIVE
STATISTICS

HYPOTHESIS
TESTING

CORRELATION &
REGRESSION ANALYSIS

NON-PARAMETRIC
TESTS

CASE STUDY &
GROUP PROJECT

About the Certificate Course

Data analysis is a discipline focused on extracting meaningful insights from data. It involves various processes, tools, and techniques for data management, statistical analysis, and interpretation. The main aim is to apply statistical tools to data and draw meaningful inferences. SPSS is one of the most popular and widely used software packages for statistical data analysis. This hands-on course provides practical SPSS training with applications across various domains, supporting participants in their academic, research, and analytical work.
